

# Maps

## ASSET MANAGEMENT USING PLANS, BIM MODELS AND MAPS

- Integration of building data from plans. DWG or BIM model.
- Continuous navigation from maps to building interiors.
- Universal search for equipment or from maps and plans.
- Automatic pairing of GIS/plans and CMMS equipment.
- Triggering of management actions from maps or plans: maintenance rounds maintenance, diagnostic...
- Geo-positioning of equipment & interventions on maps or plans.
- Graphical analysis of data by theme (occupied premises, use of premises usage, etc.) to refine maintenance maintenance decisions.
